13.	Read the paragraph and answer the questions given below. The word ecology was coined from the Greek word 'Oikos' which means home. Ecology, therefore, means the home of plants, trees and also the animals that survive on them. Ecology is the study of organisms and the inter-relationship among organisms and the environment. The destruction of our forests has led to the disturbance of the delicate balance in the entire ecosystem. It has given rise to grave risks for the very survival of life on earth. Only recently we have started correcting this dangerous situation. The concern for ecological conservation has come to dominate the world scene. a. What is the origin of the word ecology? b. What has the destruction of forests lead to?	2

14.	Read the paragraph and answer the questions given below. 1. Hygiene is the science which seeks to preserve and improve the health of the individual and of the community as a whole. Its study is aimed at making the cadets aware of the many health hazards and to enable them to look after themselves more efficiently. It seeks to develop in them the concepts of healthy living. Hygiene has nothing to do with religion or social customs but it is simply based on scientific requirements. Personal hygiene involves all aspects of the health of an individual. Responsibility for the maintenance of personal health, therefore lies with the individual. Every person must remain in perfect physical, mental and social health, only then can he serve the community and the country well. The basic factors which make a person healthy are enumerated in the subsequent paragraphs. A. The primary aim of hygiene is _____. (a) To follow religious practices (b) To preserve and improve health (c) To follow social customs (d) To encourage exercise B. Why is the study of hygiene important for cadets? (a) To learn religious practices (b) To become physically strong (c) To understand health hazards and care for themselves better (d) To develop social relationships C.
